“I DIDN’T COME THIS FAR TO MISS!”[®] | 2024

OUR MISSION

Here at HEVI-Shot®, we started out looking to create products that performed better than steel, and in the process gave birth to pellet and shotshell technologies that were more effective than traditional ammunition. For everything from waterfowl and upland birds to turkeys and predators, they all share a common result: more effective shot on target with greater range and results. Thank you for insisting on better performance—thank you for shooting HEVI-Shot.

HEVI-SHOT MERCHANDISE

Tell the world what kind of hunter you are without saying a word. We now offer a wide selection of HEVI-Shot apparel and gear that looks as good as you shoot. Go to hevishot.com to start your order.

HEVI-SHOT PRODUCTS ARE NONTOXIC

The biggest game-changer I've experienced in hunting waterfowl has been HEVI-Bismuth™. I shoot 3-inch 6 shot out of my 20-gauge, and the penetration is lethal. The pattern density of 6 shot throws an impassible wall of pellets at the birds. From small ducks to large honkers, HEVI-Bismuth is my go-to ammo.

ENDS HERE

HEVI-XII

Pack in with HEVI-XII® and come out carrying extra weight. Loaded with our original 12 g/cc tungsten that's 53.8 percent denser than steel, these loads double the downrange energy, hitting birds harder from a longer distance. This means you can drop three shot sizes for the same lethality and still put 28 percent more pellets on target.

HEVI-BISMUTH

Step up your game when you get into the blind with ammunition that works as hard as you do. HEVI-Shot® HEVI-Bismuth™ is 22 percent denser than steel, which lets you drop a shot size from your go-to steel payload yet deliver the same duck-dropping lethality. Pushed at blistering velocities, the payloads provide performance that fills limits, and they're safe to shoot in modern and classic shotguns.

HEVI-METAL XTREME™

The next evolution in waterfowl hunting is here. HEVI-Metal Xtreme™ uses Pattern Density Technology™ to devote 30 percent of the payload to 12 g/cc HEVI-XII® tungsten pellets and stack them over steel shot. The dense tungsten pellets are three shot sizes smaller than the steel to ensure both layers have equal downrange performance. The load features the FLITECONTROL FLEX® wad for consistent long-range patterns and is pushed at high velocities.

HEVI-METAL® LONGER RANGE

Push duck and goose hunts farther. HEVI-Metal® Longer Range increases downrange power 16 percent, thanks to high-density HEVI-Bismuth™ alloy pellets layered over corrosion-resistant steel shot. Using our Pattern Density Technology™, 30 percent of the payload is HEVI-Bismuth, while 70 percent is steel. It all comes together for tighter patterns, longer range and cleaner kills.

HEVI-STEEL® & HEVI-TEAL

Sometimes speed is everything. The first all-steel shotshells from HEVI-Shot®, HEVI-Steel and HEVI-Teal are pushed at higher velocities than competing loads. That speed boost delivers more energy downrange and makes it easier to connect for harder hits and more limits.

My favorite part of turkey hunting is the time I get to spend with family and friends in the woods. There's no better feeling than hearing the first gobble of the spring. I am grateful for every lesson these birds have taught me both good and bad.

**JORDAN SUMMITT,

HEVI-SHOT® AMBASSADOR**

TURKEY

**STRUT YOUR
STUFF**

HEVI-18®

Never let a hung-up gobbler keep you from notching your tag. HEVI-18® TSS Turkey uses high-density 18 g/cc pellets and our friction-reducing spherical buffer to extend effective range beyond what's ever been possible. Pushed at high velocities, TSS pellets carry more energy farther downrange, allowing hunters to drop three shot sizes from their go-to lead payloads and get higher pellet counts and denser patterns.

MAGNUM BLEND®

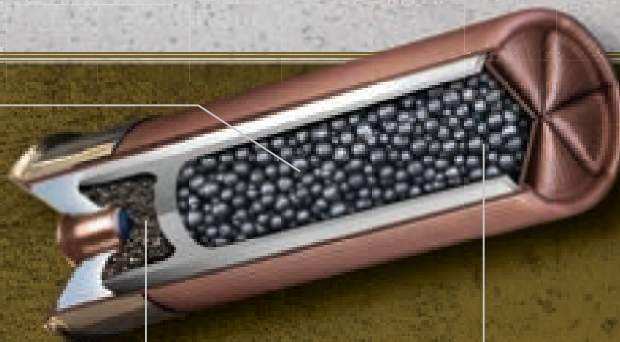

Mix it up to take more longbeards down. HEVI-Shot® Magnum Blend® combines No. 5, 6 and 7 shot cast from 12 g/cc tungsten. The heavy, high-density payloads offer as many as 448 pellets in a single 12-gauge 3-inch shell, and those shot carry far more energy than lead, extending effective range and improving pattern density. Ounce for ounce, dollar for dollar, this is the most lethal turkey load on the market.

SMOKED WILD TURKEY TACOS WITH JALAPENO LIME COLESLAW

This recipe is a take on the age-old classic stuffed with prosciutto and cheese. My mom used to make this dish and I loved it. I decided to add a rich Dijon cream sauce you'll adore!

BRINE

1 wild turkey breast
1 quart of cold water
¼ cup salt
¼ cup brown sugar
1 bay leaf

DRY RUB

1 tablespoon paprika
1 tablespoon kosher salt
2 teaspoons black pepper
2 teaspoons garlic powder
1 teaspoon Mexican oregano
(or substitute regular oregano)
1 teaspoon cumin

TOPPINGS

6 corn or flour tortillas
1 ½ cup queso fresco, crumbled
Fresh cilantro
Lime wedges

JALAPENO LIME COLESLAW

1 lb coleslaw
¼ cup cilantro finely chopped
¼ cup red onion, julienned
2 jalapeños, diced
¼ cup mayonnaise
1 tablespoon apple cider vinegar
Juice from 1 lime
2 teaspoons white sugar
1 teaspoon salt
1 teaspoon black pepper
½ teaspoon Mexican oregano
(or substitute regular oregano)
½ teaspoon cumin

OTHER INGREDIENTS

1 tablespoon olive oil
2 tablespoons melted butter

RECIPE DIRECTIONS

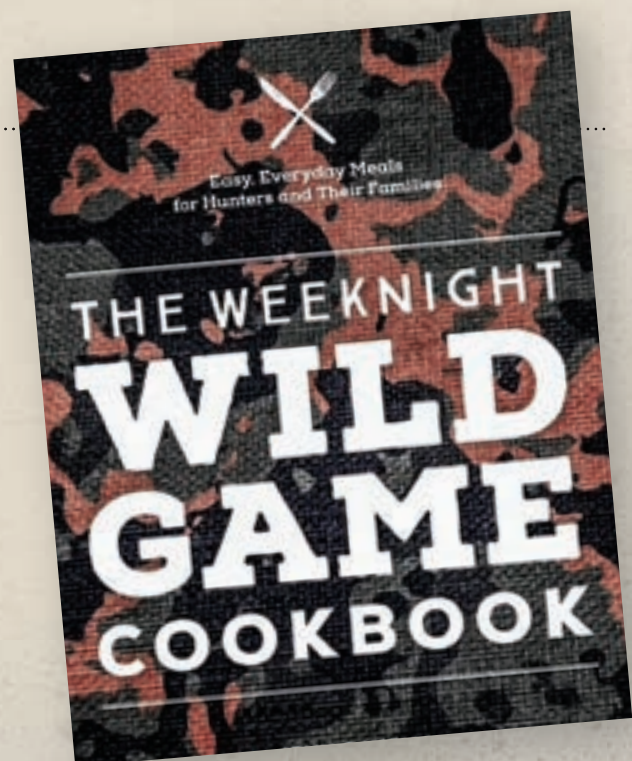

- ★ Brine: In a large glass bowl, combine salt, brown sugar, the bay leaf and water. Submerge the turkey breast into the bowl. Refrigerate for 12 to 24 hours. Afterward, remove the breast and rinse with cold water. Pat dry the breast and let sit at room temperature for about 30 minutes.
- ★ Pre-heat your smoker to 225°F.
- ★ Combine the ingredients for the dry rub in a small dish. Rub into the wild turkey breast using olive oil.
- ★ Smoke the turkey until it reaches an internal temperature of 160°F, about 4 hours. At the halfway mark, place the breast in aluminum foil, add 2 tablespoons of butter, then wrap, leaving it slightly open at the top to vent. Pour in melted butter.
- ★ Combine the ingredients for the coleslaw while the turkey is smoking. Refrigerate for at least one hour.
- ★ Once the wild turkey reaches an internal temperature of 160°F, remove from the smoker and aluminum foil and let rest for approximately 15 minutes. Then cut into bite sized pieces or shred with two forks.
- ★ Assemble the tacos taking a tortilla and adding coleslaw, wild turkey and queso fresco plus any other desired toppings.

JENN DANELLA

HEVI-Shot® ambassador Jenn Danella was introduced to hunting at a young age by her father—and she still remembers their first fishing trip. She eventually started hunting on her own and with friends in high school, and soon after, hunting, fishing, and cooking became her full-time passions.

Purchase a copy of Danella's cookbook at Amazon, Walmart, Target and Barnes & Noble.

UPLAND

BEAT A STRAIGHT FLUSH

A bad day hunting with your dog beats a good day doing anything else. Hunting with my dog created a passion for upland hunting I never thought I'd have. I love watching her work and retrieve birds for me after I take them down with the most lethal load—HEVI-Bismuth.

JENN DANELLA
HEVI-SHOT® AMBASSADOR

HEVI-BISMUTH™

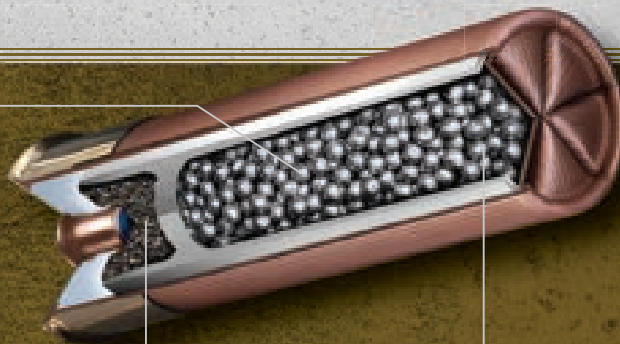

Even the odds against pheasants, grouse and other hard-flushing upland birds. HEVI-Bismuth™ Upland payloads are 22 percent denser than steel to deliver more pellets on target and maximum knockdown power. They meet nontoxic requirements and are safe for fixed-choke barrels and modern shotguns.

PREDATOR

MAKE THEM HOWL

A pup in distress call can be effective when other calls fail. Sometimes a female will run in extremely close to investigate. This sound can be used any time of year, but it works especially well in spring. It's also effective immediately after firing a shot, and I always use the call before leaving a location. Coyotes will sometimes approach from unexpected locations, regardless of wind direction, so keep vigilant!

ED SPRINGER
DIRECTOR, FACTORY
OPERATIONS
HEVI-SHOT®

"DEAD COYOTE!"[®]

Pulling coyotes into shotgun range isn't easy, so when you finally get one to commit, close the deal with the power and patterns of HEVI-Shot[®] "Dead Coyote!"[®]. Its 12 g/cc pressed tungsten pellets are frangible, non-sparking and produce more downrange energy than any other predator shell for lethal performance out to 70 yards.
